FASER

Quality is our priority

Our Quality and Food Safety Management system is based on two fundamental pillars:

- Use of quality raw materials.

Comprehensive control of cooking method.

Therefore, in our establishments we are subject to food hygiene and safety audits by a consultant specialized in Quality and Food Safety.

In these audits, management system's issues are reviewed, such as:

1. Control of drinking water.
Disinfectant ability of water.
2. Control of suppliers and raw materials.
3. Control of traceability.
4. Cleaning and disinfection.
5. Waste management.
6. Maintenance plan for equipment and facilities.
7. Training plan for food handlers.
Suitable food handling practices.
8. Disinfection and pest control plan.

At Faster Meals premises we undergo analytical control of our products and processes (Cleaning and Disinfection) through an independent laboratory.

All this combined with nutrition and dietary advice, with the aim of offering healthier raw materials so that our customers can keep a balanced diet.

Allergen information is available, please ask our staff.

Add extra ingredients, do it "like at home"
